The Administrator, Division of Environmental Protection, Carson City, Nevada is issuing the following notice of proposed action under the Nevada Revised Statutes. The Administrator has received a complete renewal application for a water pollution control discharge permit (NEV2004533) from the following applicant:

The Permittee proposes to apply tertiary treated, filtered, partially denitrified and disinfected treated wastewater effluent for reuse in irrigation at the Silver Bowl Sports Complex Park located at 6800 E Russell Rd, Las Vegas, Nevada. Treated effluent will be supplied by the Clark County Water Reclamation District facility (NV0021261) to the 66 acre park site managed by the permittee. The Permittee is authorized to receive a 30-day average flow of 0.500 million gallons per day. Reuse water will be managed by the permittee in accordance with the effluent management plan approved by the Division. Monitoring is required to assess the quality and quantity of effluent applied, and to ensure that groundwater quality is protected.

On the basis of preliminary review of the requirements of the Nevada Revised Statutes (NRS) as amended, and implementing regulations, the Administrator proposes to reissue a permit to discharge, subject to certain effluent limitations and special conditions. The permit for this facility will include sampling requirements to assure maintenance of the state ground water quality standards. The proposed permit will be issued for a five (5) year period.
